9. Select Board to Appoint Transportation Advisory Committee (TAC) Representative:
  - a. Brief Description: To fulfill Vermont Agency of Transportation (VTrans) federal requirements on local consultation, each regional planning commission must use a Transportation Advisory Committee (TAC) to meet these requirements. The TAC acts as a liaison between local communities and VTrans and provides local and regional input regarding transportation issues important to the region. The TRORC Transportation Program is guided by the TAC, which consists of representatives appointed from the Region's towns. The TAC serves in an advisory capacity to the TRORC Board of Commissioners. The TAC's purpose is to address regional transportation issues as well as advise and recommend plans, activities, and projects (through the project prioritization process) to both the member municipalities and the state and articulate regional transportation policy to the state. Meeting topics include the TRORC transportation planning work program and the items it contains, the regional transportation project prioritization list that is annually submitted to VTrans, regional public transit issues, and the TRORC Regional Transportation Plan. These topics by no means encapsulate all of those at TAC meetings, as other local and regional issues are routinely discussed. TAC meetings are held regularly throughout the year (every other month –Thursday mornings) and are open and free to the public. We are also offering reimbursement to TAC members attending transportation-related training that is in-state as a perk.
